

Hajin Lee

Product Designer

Works at both ends of a product's life: launching from nothing, and rebuilding what already shipped. Research and information architecture through to UI in Figma, then the front-end build. Sits close to engineering, where design decisions hold up or quietly get dropped.

Experience

UI/UX Designer Mar 2026 - May 2026
WeLAB Entertainment | Internship Vancouver, BC
Rebuilt and shipped the public site of a VFX and animation studio: 13 case-study pages, a before-and-after slider on the shot work, and Spanish for the Mexican market.
Mapped the core flows in Figma, then rebuilt the site in WordPress and Bricks Builder, dropping into custom code wherever the builder ran out.

Visual Merchandiser Apr 2022 - Sep 2024
Ryohin Keikaku Co., Ltd (MUJI HQ) | Full-time Tokyo, Japan
Planned the in-store visual communication from head office: brand graphics, posters and display tools, and the floor layouts that set how customers moved.
Took on the duty-free shopping experience for inbound travellers, from the offer to the in-store signage. Sales to that segment rose an average of 14% quarter on quarter.

Projects

Product Designer | Solo Concept Jun 2026 - Aug 2026
Compass Card iOS, watchOS
A new UX proposal for TransLink fares, carried from research through to UI. Removes the two-hour wait after a top-up, and the trip to the website for balance and passes.
Designed the screens and type scale in Figma, then coded them in React as an installable web app that runs from a phone home screen, plus a separate build for the watch.

Lead Developer, UX/UI Design | Team of 8 Sep 2025 - Dec 2025
ProLog Mobile app, website
Roadmap app that turns a 6,000-hour trades apprenticeship into one view, built for neurodivergent apprentices. Lead developer and UX/UI on an eight-person team.
Ran every round of the UI past the other designers and reworked it from there. Built the live app itself in React Native Expo, from the dashboard to the skills quiz.

Education

Diploma in Digital Design and Development Sep 2024 - May 2026
British Columbia Institute of Technology Burnaby, BC
Developed skills in UX/UI design, frontend development, and digital media production through collaborative, project-based work including web and mobile applications, interactive media, and business solutions.

Bachelor of Fashion Design and Textiles Mar 2015 - Feb 2022
Inha University Incheon, South Korea
Studied Fashion Design with a focus on the end-to-end fashion process, including textiles, product planning, design, production, and merchandising.

Skills

Design
Product Design
Design Systems
Interaction & Prototyping
Visual & Graphic Design
Accessibility (WCAG AA)

Research & Strategy
User Research
Usability Testing
Journey Mapping
Information Architecture

Technical Literacy
HTML, CSS, JavaScript
TypeScript, React, Next.js
Tailwind CSS, GSAP
Git, Vercel, WordPress

Tools & AI Workflows
Figma, Framer
Illustrator, Photoshop
After Effects, InDesign
Cursor, Claude Code, Codex

Languages
English
Korean
Japanese
